Management/Information Technology

Enterprise IT Infrastructure Operations & Business Relationship Management

Experienced technology management professional with an outstanding track record of delivering value through the application of technology. Enterprise architecture design and planning; including data storage, protection and recovery, virtualization and core infrastructure services delivery. Able to collaborate with cross-functional teams and translate business requirements and budgets into technical solutions via standard project management methodologies. Motivational leader of global IT teams focused on resource efficiency, high performance and personal development.

Systems & Infrastructure Management | Data Protection & Recovery
System Architecture & Design | Vendor Management & Contract Negotiation
Project Management | Personnel Development | Budget Planning & Management

Professional Experience

Calix, Inc., Petaluma, California – 2007-Present

A leading telecommunications equipment manufacturer, publicly traded, with 800 employees globally.

Manager – IT Systems Administration

Promoted to manager from Sr. Systems Administrator due to outstanding performance in my technological roles as well as my ability to mentor others within the IT team. I am accountable for the management of all server infrastructure, maintenance, upgrades, and monitoring. Work directly with business partners in development and implementation of IT projects supporting operations. Manager of global systems administration teams with members in Boston, Minneapolis, San Jose, and Nanjing, China. Collaborate with multiple vendors on support and architecture of infrastructure services and equipment.

Project Highlights:

- Virtualization of Datacenter Servers and Storage, VMWare/Cisco/NetApp
- Architecture refresh of Data Protection/Backup Infrastructure, Symantec Netbackup Appliance & AIR Replication
- Web Portal upgrade & relocation to new hosting provider
- Email Upgrade and Virtualization, Exchange 2010
- SharePoint Collaboration Deployment
- Multiple M& A infrastructure integrations, Occam Networks, Ericsson Broadband

Motorola/Next Level Communications, Rohnert Park, California – 2000-2007

A telecommunications company acquired by Motorola, Inc. 2003, this division ~500 Employees globally.

Sr. Systems Administrator – Information Technology & Engineering Services

I joined Next Level Communications in 2000 and was quickly tasked with ever-growing responsibility as company layoffs occurred. By proving my value I was kept as one of two systems administrators after the acquisition by Motorola. I was responsible for the support, maintenance and deployment of all computers, including servers, storage, network, and PBX Voice system.

As operations for the entity Next Level were concluded, I was reassigned within the greater Motorola. My responsibilities included supporting the infrastructure of another business unit located in Sunnyvale, CA while participating in corporate wide initiatives benefitting the greater Motorola.

Project Highlights:

- Nortel PBX Upgrade – Next Level
- IBM/Rational Remedy Incident management & Learning Management upgrade – Motorola
- NTIS (New Technology Introduction Services) Project Manager/Subject Matter Expert; a group dedicated to ensuring quality of new technology introduction into Motorola's engineering groups – Motorola

Société Générale– SG Cowen, San Francisco, California – 1999-2000

An investment bank providing private client and institutional banking services, San Francisco branch, ~150 Employees at this site.
